

Simplify your cleanroom  
cleaning with  
**MopSc<sup>∞</sup>p – the solution!**

**PPS**  
PFENNIG PROFI SYSTEM

The completely new development MopScoop is the solution for your daily requirements in cleanroom cleaning. The new dosing system should achieve nothing less than to solve all the problems and requirements known in the daily practice of clean room cleaning and disinfection in the best possible

way. Cleaning processes are performed by humans and should therefore be designed in a way that is as self-explanatory as possible and highly resistant to unintentional misuse. The easier a process is designed, the safer it can usually be executed.

Take it easy and experience the benefits of an overall concept elaborated down to the smallest detail.

## ... but why is MopScoop THE solution?

### + Hygienic and microbiological process safety

Maximum safety is achieved through the closed storage of the disinfectant solution during the entire working process and the completely contactless working sequence.

### + Contactless working process

Through the combination of components such as the dosing unit MopScoop, the mop disposal MopDrop CR and the mop handle ClinoSynchro CR/Hybrid, a completely touchless working process is achieved. There is no way for cross-contamination.

### + Single-use or multi-use

The dosing unit MopScoop works with single-use mop covers as well as with multi-use mop covers. The user can decide which concept he or she wants to use.

### + Ergonomics and motivation

Since there is no need to bend down during the cleaning process the motivation can be increased. Through light working material and well-conceived solutions, all working steps can be executed without the use of physical strength.

### + Precision

With a precision of  $\pm 1,3 \%$  the MopScoop dosing unit guarantees perfect and reproducible results.

### + Validation of the disinfection

MopScoop can be used with the already validated cleaning and disinfecting agents without any problems. There is no need for revalidation by cleaning with MopScoop.

Highest precision – the desired dosage runs via the stainless steel tube into the dosage tray.

**+ Space-requirements**

The required floor space is only 0.4 m<sup>2</sup>. MopScoop can be stored in the smallest spaces and can be placed like a wall bracket that can still be moved on castors.

**+ Flexibility**

MopScoop enables the exact adjustment of the required amount of liquid. The standard delivery program includes pistons with 130 ml, 200 ml and 400 ml. With a minimum order quantity of 2 pistons, special designs with any desired quantity of liquid can be produced.

**+ Longevity**

The system has been tested over 55.000 cycles. This is equal to over 1 million m<sup>2</sup>.

**+ Modular construction system**

MopScoop can be adapted on existing PPS equipment with no problems. Also there are lots of possible combinations out of stainless steel only or stainless steel-plastic mixes.

**+ No contamination sources**

There are only two moving parts and no inaccessible places.

CR4 SC/K-GMP with optional extras

CR4 SC/K-CR with optional extras

**Don't waste your time – Simplify your cleanroom cleaning!**

# Simplify your cleanroom cleaning

## Easy to clean – easy to assemble

- 1** Insert the MopScoop tray into the basic module of the cleaning trolley.

- 2** Attach the holding frame for the MopScoop container.

- 3** Insert the MopScoop container into the holding frame.

- 4** Insert the dosing pipe into the recess at the bottom of the MopScoop container.

- 5** Screw the plastic nut to the dosing pipe.

- 6** Insert the appropriate dosing piston into the dosing pipe.

- 7** Insert the operating lever into the prefabricated bearings at the edge of the tray.

- 8** Pour in the disinfectant solution and close the lid.

# MopScoop – that's how it works

With MopScoop we provide you with a tool which largely eliminates all sources of contamination. Due to the completely contactless process – from the reception

and the impregnation up to the detachment of the mop cover – you have a 100% safe cleaning equipment at your side.

- 1**
- Push the operating lever down by pressing the mop frame onto the MopScoop tray.
  - MopScoop automatically doses the required liquid quantity for the first wiping process.

- 2**
- Open the mop frame contactless.

- 3**
- Pick up a fresh mop with the mop frame without hand contact and without bending down.

- 4**
- Push the MopScoop operating lever – the mop absorbs the liquid.

- 5**
- Pull up the mop frame.
  - The dosing quantity for the next wiping process is provided by MopScoop at the same time.

- 6**
- Perform wiping process and drop the mop contactless into the mop disposal.

Trolley combination **CR4 SC-CR**  
with 2 system boxes EasyMop  
for areas in which many mop covers  
are required

# Cleaning trolleys with MopScoop

Picture shows model, including operational extras

## Clino CR1 SC-GMP

For highly sensitive areas – small space requirement with mop disposal

- + Highest efficiency, great safety, individually configurable
- + Immediate impregnation of the wiping textiles is carried out just before use

**Art. No.: 3510300**

Dimensions (LxWxH): 74 x 53 x 70 cm

### Basic components

- Base frame cleanroom small
- Stainless steel, suitable for cleanrooms, high-end finish
- Autoclavable, swivel castors, 100 mm with deflector ring

### Working area

- MopScoop unit with stainless steel lid
- Stainless steel container MopTen

### Mop Disposal

- Unit 1 x 35 l
- Stainless steel container 9 l

Picture shows model, including operational extras

## Clino CR1 SC-CR

For highly sensitive areas with small space requirement – without sterility requirement

- + Highest efficiency, great safety, individually configurable
- + Immediate impregnation of the wiping textiles is carried out just before use

**Art. No.: 3510310**

Dimensions (LxWxH): 74 x 53 x 70 cm

### Basic components

- Base frame cleanroom small
- Stainless steel, suitable for cleanrooms, high-end finish
- Electrically conductive special castors, 100 mm

### Working area

- MopScoop unit with blue lid
- System box EasyMop

### Mop Disposal

- Unit 1 x 35 l
- Stainless steel container 9 l

# Clino® CR special mop covers

Examples for mop covers with max. liquid absorption of 400 ml

## MicroSicuro CR

Art. No.: 2700266

Made & processed  
in Germany

- + Maximal cleaning performance through 2-component work material
- + Ideally suited for loosening adhesive impurities
- + Germ reduction of bacteria, yeast and mould by over 99% is already achieved when using just water (test method DGMH, 2001. Standard method 14)
- + Very large square-metre performance
- + Through maximal capillary effects, optimally suited for all PPS cleaning methods

Floor types	All standard cleanroom floors, pharmaceutical floors, perforated plates and anti-slip flooring
Work materials	100% PES microfibre with PA bristle-like material
Equipment	With a water-permeable mop cover with EasyFlow pocket system, with back-lining for high square-metre performance
Weight	120 g
Dimensions	40 cm
Packaging	Packaging unit: 10 pieces Also deliverable in smaller amounts

## MicroSicuro CR/A

Art. No.: 2700268

Made & processed  
in Germany

- + Removes 99.9% of all particles in a single-stage process
- + Safe disinfection of GMP areas through validatable wetting behaviour
- + Maximal square-metre performance through use of innovative combination of materials; ideal for removing disinfectant residues
- + Autoclavable for up to 50 preparation cycles, resistant to disinfection solution and gamma rays
- + Through maximal capillary effects, optimally suited for all PPS cleaning methods

Floor types	All standard cleanroom and pharmaceutical floors, perforated plates and anti-slip flooring
Work materials	100% PES microfibre and soft-brush special
Equipment	With a water-permeable mop cover, with EasyFlow pocket system, with back-lining for high square-metre performance
Weight	110 g
Dimensions	40 cm
Packaging	Packaging unit: 10 pieces Also deliverable in smaller amounts

Art. No.: 2700310 Cleanroom mop MicroSicuro CR/A 50 cm

# Clino® CR special mop covers

Examples for mop covers with max. liquid absorption of 200 ml

## UnoSicuro S PW 40 cm, non-sterile

**Art. No.: 3500321**

**Made & processed**  
in Germany

Premium quality in the area of single-use mops. Manufacturing, preparation and packaging in Germany in a controlled environment.

- + The premium single-use mop with coverage of up to 20 m<sup>2</sup> mopping performance
- + Lowest particle emission and excellent liquid management
- + Can be reused outside of the cleanroom

<b>Floor types</b>	All standard cleanroom and pharmaceutical floors
<b>Work materials</b>	100% polyester with structured wiping surface – excellent particle retention properties
<b>Equipment</b>	With water-permeable mop cover, pocket and back-lining for high square-metre performance
<b>Weight</b>	58 g
<b>Dimensions</b>	40 cm
<b>Packaging</b>	5 pcs. double-packaged, 1 PU: 5 pieces, 10 PUs per carton
<b>Preparation</b>	Validated washing process under cleanroom conditions as per ISO purity class 5, batch documentation as per the ASTM method

## UnoSicuro S PW / I 40 cm, sterile

**Art. No.: 3500331**

**Made & processed**  
in Germany

Premium quality in the area of sterile single-use mops. Manufacturing, preparation and packaging in Germany with all required documents and certificates.

- + The premium single-use mop with coverage of up to 20 m<sup>2</sup> mopping performance
- + Gamma ray irradiated with validated process
- + Ideal for small areas under sterile conditions

<b>Floor types</b>	All standard cleanroom and pharmaceutical floors, including areas under sterile conditions
<b>Work materials</b>	100% polyester with structured wiping surface for better binding of particles
<b>Equipment</b>	With water-permeable mop cover, pocket and back-lining for high square-metre performance
<b>Weight</b>	58 g
<b>Dimensions</b>	40 cm
<b>Packaging</b>	Packaged individually under sterile conditions, 5 pcs with outer packaging 1 PU: 5 pieces, 10 PUs per carton
<b>Preparation</b>	Validated washing process under cleanroom conditions of the ISO purity class 5, batch documentation as per the ASTM method, gamma ray irradiated, including certificate

# Clino® CR special mop covers

Examples for mop covers with max. liquid absorption of 130 ml

## King CR Wiper Mop PW and PW/I

**PW: Art. No.: 3500055**

**PW/I: Art. No.: 3500056, gamma ray irradiated**

- + Economical single-use mop cover
- + If desired, gamma ray irradiated, available in double packs
- + Ideally suited for cytostatic areas
- + High degree of area coverage through back-lining
- + High-quality, cleanroom-suitable workmanship

Floor types	All standard cleanroom and pharmaceutical floors
Work materials	100% Polyester
Equipment	With polyester pocket, with back-lining
Weight	50 g
Dimensions	40 cm
Packaging	Pre-washed, individually double-packaged

## King CR Wiper Mop S PW and S PW/I

**S PW: Art.-No.: 3500063**

**S PW/I: Art.-No.: 3500068, gamma ray irradiated**

- + Excellent cleaning performance through 100% polyester microfibers
- + Special structure for optimal particle absorption
- + Very high-quality, cleanroom-suitable workmanship
- + High surface performance through back-lining
- + Also ideal for cleaning walls or ceilings; can be sterilised

Floor types	All standard cleanroom and pharmaceutical floors
Work materials	100% Polyester with special structure
Equipment	With polyester pocket with back-lining
Weight	64 g
Dimensions	40 cm
Packaging	Pre-washed, individually double-packaged

# PPS – the company

## Planning and consulting:

Based on the PPS system cycle, our internal and field sales specialists analyse your individual needs and requirements.

## Engineering:

Using the modern 3-D design software "Solid Works", we can demonstrate different solutions – of course, your own specific ideas are also welcome.

## Flexible manufacturing:

Through the high level of qualification, our metal, plastic, and textile specialists are able to quickly implement your requirements – even if this requires an individualised construction/solution.

## Quality:

All of our products are made with our own tools; we have been implementing a quality management system in accordance with ISO 9001 etc. since 1994.

## 10-year guarantee on availability of replacement parts:

We support the proverbial durability of our systems by guaranteeing spare parts availability for 10 years as well as a complete renewal service for stainless steel trolleys that are up to 20 years old.

**You have to be able to react quickly?**

If required, we will also deliver large-scale machinery within a short period of time.
