PHARMACLEAN® AUTOCLAVABLE BAG

DESCRIPTION

Pharmaclean® protective bags, realised in DuPont™ Tyvek®¹ material, are the fastest method for protecting and covering small components and tools from any external contamination in aseptic production areas. These bags can be closed through heat-sealing. They prevent the entrance of dust and particles, ensuring a more effective barrier than medical paper. Autoclavable, with low particle release and highly breathable, these bags are moisture and puncture resistant. They are worked in cleanroom and available also in irradiated sterile version.

¹ DuPont™ and Tyvek® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.
